

Capitalizing on Coastal Blue Carbon

The Conference Center at Massasoit Community College | May 12-13, 2015

Results of the Bringing Wetlands to Market Project
and Related Research and Implications for
Wetlands Conservation and Restoration in New
England and Beyond

A wide-angle photograph of a coastal landscape. In the foreground, there is a body of dark blue water with gentle ripples. To the right and extending into the background, there are vast fields of tall, golden-brown marsh grasses. In the far distance, a dense line of trees with green and some autumn-colored foliage stretches across the horizon under a sky filled with soft, white and grey clouds.
